```
$ python -m wad.per_detection --features yolo   (training the per-detection model)
train features (yolo, 68 columns): 3338916 detections, 81 s
model: 107 iterations, 171 s -> C:\Users\nicho\Downloads\Weather Adaptive Autonomous Driving\wad-
    harness\weights\per_detection_yolo.joblib
BDD100K: graded, 223 s
DAWN: graded, 225 s
fold 0: 104 iterations, 88 s
fold 1: 103 iterations, 86 s
fold 2: 97 iterations, 82 s
fold 3: 97 iterations, 82 s
fold 4: 102 iterations, 84 s

$ python -m wad.dial_ablation   (ablations: refits on BDD100K train, graded on BDD100K val / DAWN)
train: 3,338,916 detections on 21,831 images, 223 s
model 2 (adopted, 68 features) [100%, seed 0]: 107 iterations, 210 s fit; BDD100K lam 10 cost 0.9103 (0.9062-0.9146),
    DAWN 0.9332; ECE 0.11 / 0.98 pt; total 525 s
without class probabilities (-10) [100%, seed 0]: 113 iterations, 172 s fit; BDD100K lam 10 cost 0.9139
    (0.9097-0.9182), DAWN 0.9546; ECE 0.14 / 1.16 pt; total 706 s
context only (model 1, 20) [100%, seed 0]: 81 iterations, 61 s fit; BDD100K lam 10 cost 0.9366 (0.9329-0.9405), DAWN
    0.9377; ECE 0.12 / 0.97 pt; total 1199 s
score and class only (2) [100%, seed 0]: 77 iterations, 32 s fit; BDD100K lam 10 cost 0.9946 (0.9929-0.9964), DAWN
    0.9877; ECE 0.14 / 1.00 pt; total 1355 s
model 2, training subset [10%, seed 0]: 84 iterations, 15 s fit; BDD100K lam 10 cost 0.9340 (0.9299-0.9383), DAWN
    0.9570; ECE 0.28 / 1.07 pt; total 1376 s
done, 1852 s

$ python -m wad.crc_lambda   (pre-registered: CRC over lambda vs the per-weather baseline, 200 splits)
BDD100K: evaluated, 776 s
DAWN: evaluated, 813 s
sanity: the baseline arm reproduces run 2's 200-split per-bin summary
C1 validity: ours mean held-out miss <= alpha + 0.01 wherever the baseline holds (alpha 0.2) -> 11 conditions where
    the baseline holds; ours max mean miss 0.1984 -> met
C2 price: median per-split FPPI ratio ours/baseline < 1 in >= 9 of 11 conditions -> 11 of 11 -> met
C3 pooled price: 97.5th percentile of the pooled per-split ratio < 1 -> median 0.610, 95% 0.589-0.633 -> met
done, 831 s
